### **DETAILED ACTION**

The following is an examiner's statement of reasons for allowance: The present invention is directed to a retractable earphone wire holder. Independent claim 1 identifies the uniquely distinct feature of an interconnecting swinging rod to activate a switching button to automatically switch "on" the earphone when extracted and automatically switch "off" the earphone when retracted. The closest prior art, Luplow (US 5339461) teaches a retractable radio receiver with external controls on the housing for adjusting volume or changing stations and Liao (US 6371398) teaches a dual wheel retractable housing for independent extraction of the plug and earphone ends. The prior art fails to anticipate or render the independent claims obvious.

The following references were cited: Chen (US 5684883) teaches a device for receiving earphone wires of a hands free communication device and Wei (US 6434249) teaches an earphone winding box comprising dual coaxial wheels.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Ensey whose telephone number is 703-305-7363. The examiner can normally be reached on Mon-Fri: 8:00 - 4:30.
